

	SUSTAINABILITY MESSAGE	Instruction No:	YE-POL-13
		Page No:	1 / 1
		Publication Date:	01.01.2025

Dear Guests and Business Partners,

As ARENA HOTEL, we have embraced contributing to a sustainable future as one of our core values, conscious of our responsibility to our environment and society. In conducting our activities, we consider the protection of nature and social benefit, taking into account our environmental and social impacts in every step we take.

We take a determined approach to the efficient use of natural resources, reducing our carbon footprint, and waste management. We continue to develop innovative methods to save water, promote recycling, and reduce our energy consumption. These efforts are part of our goal to minimize our environmental impact without compromising the comfort of our guests.

Our sustainability approach encompasses not only environmental but also social responsibilities. We build strong ties with local communities and contribute to the economy by prioritizing local products and services. We support the adoption of this mindset at every level by raising awareness about sustainability among our employees.

Along this journey, the support of our guests and business partners is a great source of motivation for us. Together with you, we can promote responsible tourism and protect both nature and local cultures. We invite you to join our sustainability efforts and believe that together we can achieve these goals.

We thank you for your contributions to nature and society. We will continue to work together for a brighter future.

With love and respect,

ARENA HOTEL
GENERAL MANAGER / MANAGER
